World Micro Announces ITAR Registration and Approval With the United States Department Of State

Atlanta, GA, February 1, 2010 – World Micro, Inc. announces that it has been approved for, and is in compliance with, the International Traffic in Arms Regulations (ITAR) administered by the United States Department of State Directorate of Defense Trade Controls. The ITAR approval controls the export and import of defense articles and services.

ITAR registration and compliance is a key strategic achievement for World Micro and builds upon the company's existing and expanding embedded computing platform.

ITAR registration and compliance is an achievement for World Micro and builds upon the company's existing and expanding support for a growing list of military market customers by complying with the Arms Export Control Act (AECA). As an ITAR registered company, World Micro has met the corporate procedures and control requirements for compliance to fully participate as an approved supplier for a wide variety of military and aerospace customers within the United States.

“World Micro’s commitment to quality and meeting the needs of our customers is what makes us stand out within our marketplace,” commented Chris Ellsworth, World Micro’s VP of Operations, “The company’s ITAR registration and compliance demonstrates that commitment, and our drive to constantly improve and expand our capabilities. It is also one more way that our military and aerospace customers can be assured of a knowledgeable and reliable source for their parts and components.”

ABOUT - World Micro is a global electronics distributor and End-of-Life Solution Provider. Since, 1995, World Micro has helped Purchasing and Engineering Departments at leading OEM, EMS, and ODM companies research, design, source, stock, procure, inventory, and manage board level components, embedded computing products and military/aerospace specialty hardware.
